

Choose To Serve

✓ **Organize A Workshop:** Our in-country partners often are agencies that serve Deaf and DeafBlind communities. If you are one of those, please reach out to us.

✓ **Teach the Bible to Deaf and/or DeafBlind:**

If you have literacy experience with Deaf and/or DeafBlind persons (*American Sign Language required*), or have taught Braille, our edit and teaching team needs you.

✓ **Become A Translator**

For people groups around the world to be able to teach the SUN Bible to the Deaf in their communities, they need training materials in their native language.

We are seeking native or bilingual speakers of other languages who can translate our English SUN training documents in their native language. Using your language skills, you can help bring the Gospel to the Deaf and DeafBlind around the world.

We're Passionate About Serving the Deaf and the DeafBlind.

SUN (Symbolic Universal Notation) is a pictorial language created to provide Scripture to the Deaf and DeafBlind with little access to education who have not yet learned how to read or use their national sign language. It is made up of one hundred core symbols that are the building blocks for the rest of the language. Using a symbolic system of writing, they are able to read God's Word for themselves.

How It Works:

It consists of a small group of universally recognized characters that are combined or changed to make additional symbols which are called extensions. Between the characters and extensions, all of Scripture can be represented.

Making A Global Impact

Examples:

person

basic

sleep
lie_down, rest
(person)

changed

baptize
baptism
(water, person)

combination
