How to Use the SUN Reader's Dictionary

This dictionary contains all the words in the Bible and is useful for a reader to look up the meaning of a new symbol that they encounter in the text.

The dictionary is organized by the basic, core symbols. The Table of Contents lists all the basic symbols and gives the page number where a basic symbol's changes and combinations can be found. Page numbers are located at the bottom of the page.

In addition, at the end of the Table of Contents there are page numbers for the Proper Noun combinations.

1. **When a symbol with a change or combination needs to be found**, look carefully at all the basic symbols that are a part of the combination.
2. Choose one of the basic symbols that will be the most helpful for you.
3. In the Table of Contents, find that basic symbol and its page number.
4. Turn to that page number and search for the change or combination that you need. It may be easiest to search down the columns.
5. The main meaning is in bold print and the other secondary meanings are in italics below the main meaning.
6. The words in the parentheses are teaching aids to explain the combination.

Note: Some of the words in the parentheses may contain new combinations, for example: find (good, search)—“good” is a basic symbol but “search” is also a new combination.

Examples:

father -  This symbol can be found in the “man”  and “love”  sections.

eternal -  This symbol can be found in the “all”  and “time”  sections.

give -  This symbol can be found in the “hand”  and “love”  sections.

descend -  This symbol can be found in the “straight”  and “arrow”  sections.

Exceptions:

money -  Circle is not a basic symbol, so look under “king”  to find this symbol.

deep -  The squiggly line is not a basic symbol, so look under “arrow”  for this symbol.

proper nouns – Proper nouns always have a small up arrow on the upper left of the symbol. Locate the Proper Noun base symbol category at the end of the Table of Contents. The category for “Proper Nouns Other” includes Bible, people groups, festival days, angels, idols, etc.

SUN Grammar Rules for Readers

1.) Proper nouns have a special indicator mark, a small arrow in the upper left corner of the symbol. Proper nouns are names of people and places. 

2.) Plural words are typed twice. Example: things = . Exceptions are:

boys: , sons:  brothers: , girls: , daughters: ,

sisters: , children: . Only nouns are made plural in SUN, not verbs.

- Ordinal numbers are followed by a singular noun.

Example:  = third day.

- Cardinal numbers are followed by a plural noun.

Example:  = three days.

- All day: 

- Every day: 

3.) Black dots  in the corner of words mean the word is possessive.

 = my

 = yours

 = our

 = theirs

4.) All sentences follow this sentence structure:

- Subject, Verb, Direct Object
- Adjectives before the noun
- Adverbs before the verb
- Possessives before the thing they possess. Example: God's house.:  house.

Exceptions:

1. If the verse is a command, it begins with a verb. Example: put oil in flour

2. Some verses begin with an if clause. The second sentence completes the thought. For instance: if cloud cover tent. people no go in tent.

3. Some verses begin with a because clause. The second sentence completes the thought. For instance: because you past gentiles in Egypt. love gentile same love self.

4. Some verses begin with a time reference, beginning with "when" , "after", or "day" or "night." For instance: after you prepare grain offering. take grain offering to Yahweh.

5.) All sentences are no more than 7 symbols long.

6.) Numbers greater than ten are written separately.
